Tuples - Practice Problems

Write a Python program to remove an empty tuple(s) from a list of tuples.

```
[('',), ('a', 'b'), ('a', 'b', 'c'), 'd']
```

Write a Python program to create a new list of tuples by replacing the last value in each tuple in a list by 100.

```
[(10, 20, 100), (40, 50, 100), (70, 80, 100)]
```
